#### THE STORY OF THE STORM

[Continued From First Page.]

enough to reach the Colonies, they were called tin cans and people who claimed to know all about a steamship told how they would not sail in them for fear of never being heard of again. It is not necessary to say that the predictions of the know-it-alls was proven rot, and the two vessels in question are today two of the finest vessels ever turned out of an American shipyard and good for many years to come.

The Sierra it is true is in a way a disappointment at the present time. That she is a magnificent sea boat is testified to by most of those who made the trip on her. Of course things did not go as smoothly as they will when she is two or three months older and her officers and men become accustomed to her and learn her ways and other notions. From the great length of time it took to discharge her cold storage freight it would appear that she is not as well arranged for the quick handling of freight as should be expected in a modern boat.

As to her speed the run she made around the Horn to San Francisco speaks for itself and considering that about forty-eight hours after she had had her trial trip she started out on the fourteen thousand mile run without alteration or repair, the trip was a noteworthy one.

Taking her all in all the Sierra while she is different from any other boat coming here and is probably better arranged for the comfort of passengers does not appear to be near as fine a vessel as either the China, Doric or Coptic; and although it is confidently expected that she will prove her speed she falls far short in the estimation of many of being as fine a specimen of the Cramps' work as was anticipated.

She left for the Colonies last evening about eleven o'clock.

#### METHODISTS IN MANILA.

Leader in Charge of the Mission Describes the Work.

CHICAGO, Dec. 18.—Bishop McCabe of the Methodist Episcopal church has received a letter from the Rev. J. L. McLaughlin, presiding elder of that denomination in the Philippine Islands, describing the religious conditions and calling for more men to assist in carrying on the work. He said:

"What we need is a teacher, deaconess or trained worker to go into the communities now and train the people. Now is our golden opportunity."

"A few months ago our native preacher opened services in a small

village near Manila. After five weeks, when on account of pressure of work he was compelled to discontinue at that place, a delegation headed by the president of the village came in and pleaded with us for a preacher, so we sent one out.

"We held services two Sundays in a cockpit. Then we repaired to the church where we have been worshipping ever since. After careful explanations and invitations 288 names have been given and the parties received into our church on probation."

#### MORE SHIPS FOR THE NAVY.

House Bill Likely to Call for Two Battle Ships and Two Cruisers. WASHINGTON, Dec. 8.—It is expected that the forthcoming naval appropriation bill now being framed by the House committee on naval affairs will contain a provision for two more battle ships and two armored cruisers, following the recommendations of Secretary Long.

Admiral Hichborn, chief of the bureau of construction, was before the committee today. His estimates are about \$21,000,000 for the construction already authorized. This is considerably more than ever before required, and Admiral Hichborn explains that it was the necessary result of the large amount of naval ship building which recent congresses had authorized.

#### HONOLULU STOCK EXCHANGE.
